

Financing Your Next Community Project

Meeting the demands of repairing and replacing water and wastewater infrastructure is taking its toll on many small utility systems. MRWA is bringing together several entities that offer funding for small systems in this session.

Our objective is to promote awareness of funding sources, the rules, regulations, application processes, names, addresses, and “HOW TO’S” all under one roof. **This is a don’t miss session if you are looking to fund a project in 2018.** Your attendance will greatly benefit your community for years to come.

Programs to be discussed include USDA Rural Development, Drinking Water Revolving Loan Fund, Clean Water Legacy Act, Clean Water Revolving Fund, Public Facilities Authority, Long Term & Interim Financing, and the grants process.

Learn how these funding entities are working together to put affordable projects together for communities. Acquiring funding for needed infrastructure improvements is time consuming and complex. Learn how to do your research and “homework”.

Groups targeted for participation in these sessions are: mayors, administrators, economic development personnel, utility superintendents, engineers, water and wastewater operations specialists, and others involved or interested in the financial stability of municipal and rural water systems.

Sponsored By MRWA Corporate Partners:

Diamond Partners: Copperhead; Engineering America, Inc. and Kodru-Mooney
