

MRWA Line Tracing Training Session - Annandale

The training will consist of classroom time as well as hands-on field time. Whether you have line tracing equipment currently or plan to purchase in the future, this class will greatly benefit you.

All attendees are encouraged to bring their own locating equipment for instructional purposes. Demo equipment will also be provided for hands-on field use. All aspects of locating, for both conductive and non-conductive pipes, will be covered. Agenda is shown below:

- 8:00am Explanation of January 1, 2006, Office of Pipeline Safety - State Statute for Right-of-Way Locating Requirements.
- 9:15am Introductions to water & wastewater industry specific line tracing equipment and tools. **New line tracing specification explanation.**
- 10:00am Conductive line locating
- 10:45am Inductive line locating
- 11:30am Point and radio frequency sonde locating for non-conductive piping
- 12:00pm Lunch (**Provided**)
- 1:00pm Concurrent hands-on stations throughout host city, including:
 - *Water service locating (copper/plastic)
 - *Sewer service locating (plastic/conductive)
 - *Watermain locating (conductive)
 - *Tracer wire locating (plastic pipe)
- 4:00pm End of Day

The intent of this course is for both experienced and inexperienced locators to leave this session with a greatly improved confidence and understanding of line tracing.
